

82-9701

CHARGE DNA™ 5.1+

BATTERY CHARGER & MAINTAINER

The ChargeDNA™ 5.1+ is a high-output, fully automatic 6V/12V battery charger and maintainer engineered for automotive, powersports, lawn & garden, and marine applications.

--	--	--	---	--	---	---

Designed to handle larger batteries with precision and efficiency, it delivers a true 5.1A output while actively monitoring battery condition. From daily drivers and work trucks to ATVs, farm equipment, and boats, the 82-9701 keeps batteries at peak performance year-round — even in extreme cold or low-voltage recovery situations.

FEATURES & BENEFITS

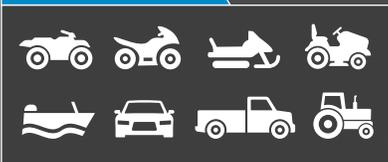

- The charger delivers a true 5.1A output for fast, efficient charging of larger batteries
- Low-voltage recovery safely revives deeply discharged batteries down to near 0 volts
- Fully automatic operation prevents overcharging and maintains battery health
- A built-in microcontroller delivers precise voltage and current for optimal performance
- The charger supports 6V/12V lead-acid (up to 120Ah) and LiFePO4 (up to 60Ah) batteries for automotive, powersports, lawn & garden, and marine applications
- Built-in protections include spark-proof operation, reverse polarity protection, and over-temperature shutdown
- The product is backed by a 3-year warranty for long-term confidence

CHARGES LiFePO4 AND LEAD ACID

SMART CHARGE SYSTEM

3-YEAR WARRANTY

CHARGE & MAINTAIN

CHARGER TYPE: FULLY AUTOMATIC SMART CHARGER / MAINTAINER

SUPPORTED BATTERY VOLTAGES: 6V / 12V

BATTERY CHEMISTRIES: LEAD-ACID (AGM, GEL, FLOODED), LiFePO4

OPERATING MODES: STANDARD, LOW VOLTAGE RECOVERY, COLD MODE

SAFETY PROTECTIONS: SPARK-PROOF, REVERSE POLARITY, OVER-TEMPERATURE

MAXIMUM CHARGING CURRENT: 5.1A

LEAD-ACID BATTERY CAPACITY: UP TO 120AH

LiFePO4 BATTERY CAPACITY: UP TO 60AH

INPUT CORD LENGTH: 72 in (183 cm)

OUTPUT CORD LENGTH: 54 in (137 cm)

WARRANTY: 3 YEARS
