CLEAR PROTECTION. SUPERIOR FUEL RESISTANCE.

Grote PVDF (Kynar®) Heat Shrink Tubing delivers excellent fuel and chemical resistance compared to conventional polyolefin heat shrink tubing, making it an ideal choice for demanding electrical applications. Its clear construction allows connections and components to remain visible after installation, while the 2:1 shrink ratio provides a secure fit across a range of wire and connection sizes.

Clear tubing keeps connections visible after installation, simplifying wire identification and visual inspection

FEATURES & BENEFITS

- **PVDF (Kynar®) Construction** offers improved fuel and chemical resistance compared to conventional polyolefin tubing for applications where chemical exposure is a concern
- **Clear Tubing Keeps Connections Visible** after installation, simplifying wire identification and visual inspection
- **Designed for Demanding Applications** provides a specialized solution for electrical repairs where standard heat shrink may not offer the required chemical resistance
- **Protective Coverage Helps Shield** wire splices/electrical components in challenging operating environments
- **Enhanced Material Performance** offers an upgrade from general-purpose heat shrink tubing for applications requiring greater fuel and chemical resistance
